Primary records (database, auth, stored files) stay in Canada. Application compute, email, billing, and connected calendars, meetings, payments, or accounting may process personal information outside Québec, including the United States (and, for Sage, typically the United Kingdom). Yuzu Solutions Inc. has assessed those communications under Law 25 s. 17. Firms that enable a calendar, meeting, payment, or accounting tool instruct us to send the related details to that provider.

Yuzu Solutions Inc. personnel who hold the platform wrap key can decrypt firm data in order to operate or restore the service.
