

Firm privacy impact assessment (EFVP) template

For: consulting firms that use Yuzu Immigration

Why: Québec Law 25 requires an EFVP before acquiring, developing, or overhauling an information system that involves personal information, and before communicating personal information outside Québec.

Vendor pack: read vendor-due-diligence-pack.pdf and yuzu-subprocessors.pdf first.

This is a template, not legal advice. Complete it for **your** firm. Keep the signed copy in your privacy file. You may send a high-level copy to Yuzu Solutions Inc. at privacy@yuzu.solutions if you wish; you are not required to.

Firm legal name: _____

Person in charge of personal information: _____

Email: _____

Date: _____

Product assessed: Yuzu Immigration, operated by Yuzu Solutions Inc.

1. Project

We are adopting Yuzu Immigration as our practice-management system (client records, questionnaires, form fill, documents, portal, calendar, public booking).

☐ New system ☐ Replacement of [prior tool] ☐ Major change: _____

2. Personal information we will enter

Check all that apply:

- ☐ Identity and contact (name, email, phone, address)
- ☐ Immigration status and history
- ☐ Passports and supporting documents
- ☐ IRCC / MIFI questionnaire answers
- ☐ Consultation notes
- ☐ Information about spouses / children / other family members
- ☐ Information about minors under 14 (parental authorization required in Québec)
- ☐ Booking and payment details
- ☐ Other: _____

Sensitive information: immigration files are generally sensitive. We will obtain **express** consent (see firm-consent-retainer-language.pdf).

3. Purposes

We will use the product only to deliver immigration professional services, manage appointments, and meet College / legal duties. We will not use the product to collect extra information “just in case.”

4. Extra-Québec communications

Yuzu hosts the system of record in Canada (Montréal region). Application hosting, email, and optional Google / Microsoft / Zoom / Square tools may process data in the United States.

We will enable (check):

- ☐ Email via the product (Resend)
- ☐ Google Calendar / Meet
- ☐ Outlook / Teams
- ☐ Zoom
- ☐ Square payments

For each box checked, we accept that personal information (for example guest name, email, phone on a calendar event) will be sent to that provider, and we have considered that provider’s protection (contracts, encryption, purpose limitation). See Yuzu’s transfer summary in the vendor pack.

Our decision: ☐ Proceed with the checked tools ☐ Proceed without optional US tools ☐ Do not proceed

5. Risks and measures (firm-controlled)

Risk	Our measure
Too many staff can open files	We will assign Admin and Case Manager roles so only staff who need the file work it
Portal account leakage	We will send portal invitations only to the client’s email on file; clients set their own password or use Google sign-in
Over-collection	We will only request documents and answers needed for the mandate
Minors	Parental / guardian authorization before collecting information about a child under 14
Retention	We will close files in the product so the six-year hold starts; after that we will destroy when purposes are fulfilled
Incidents	We will keep firm-confidentiality-incident-register.pdf and use the notice templates

6. Residual risk we accept

7. Approval

Person in charge of personal information: _____

Date: _____

Signature: _____

CAI guidance: <https://www.cai.gouv.qc.ca/>

This template does not replace the CAI's official EFVP report model. Attach extra pages if the project is large.
